7070 BC

Earliest domestic cereal
grains

By 755310C

Agriculture was well established in at least 3 Near Eastern regions: Jordan, Iran, And Anatolia (Turkey). The advanced state of agriculture at the time presupposes a long development, indeed, the very existence of a town like Jericho gives strong support to this assumption.

7000 BC

Walled settlement at Jericho
Pottery develops.

man begins to learn to use metals

C 7070BC

Life-sized plaster figures - Palestine

c 7000 BC

Domestication of sheep, goats and cattle.

7000 BC

Work. Surviving hunter-gatherers of recent times, driven into the least beautiful margins of the world, were able to obtain plenty of food for everyone from about 4 hours "work-like activity" a day. "Probably with the advent of agriculture, people had to work harder".

Work may have begun only with the advent of the plow 4000 BC

7000 BC

Post hunting world.

? 7000 BC

YAMS domesticated.
